(Field) (County of Subdivision) (State of Territory)	(Field)	(Co	unty or Subdivision)	(State or Territory)

The elevation of the derrick floor above sea level is ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I plan to drill a 2850' Premier Sand test, using cable tools all the way.

I will set 10 3/4" surface pipe in the top of the salt at appreximately 385' with 50 sacks.

I expect to mad 8 5/8" for a Queen water shut off at approximately 2140'.

 λ 5 $1/2^{\alpha}$ oil string will be commuted on top of the pay at approximately 2800° with 100 sacks.

All easing will be run and comen od using methods approved by the ${\tt U.~S.}$ Geological Survey

I understand	d that this plan of work must receive approval in writing the lie Trigg	ng by the Geological Survey before operations ma	y be commenced.
