Federal "P"
Well No. **9-3** is located **2310** ft. from **SW** line and **660** ft. from **E** line of sec. **3**
NE/4SW/4 Sec. **3** **16S** **30E** **N.M.P.M.**
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
W. Henshaw Grayburg **Eddy** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **3875** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casing; indicate adding jobs, cementing points, and all other important proposed work)

I plan to drill a 2900' Grayburg sand test, using cable tools.

I propose to cement 10 3/4" surface casing at approximately 450' with 75 sacks.

8 5/8" will be mudged around 2220' for a Queen water shut off.

A 5 1/2" oil string will be cemented above the pay, at approximately 2860' with 100 sacks cement.

All casing will be run and cemented using methods approved by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
