DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On July 11, 1956 we ran 543' of 10 3/4" OD mixed 40 & 32.75# new and used casing to 540' and cemented with 50 sac Alamo cement. After allowing to stand cemented for 72 hours, we bailed hole dry drilled plug and re-ran bailer. As shut-off proved complete, drilling was resumed. Cementing was done by Denton Oil Well Cementing Company.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
