DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On October 29, 1956 we ran 517' of 10 3/4" OD 32.75# 8rd thrd mixed new and used seamless casing to 522' and cemented with 50 sac cement preceded by heavy mud to surface.

After allowing to stand cemented for 48 hours, we drilled plug, bailed hole down and re-ran bailer. As shut-off proved complete drilling was resumed.

Cementing was done by Denton Oil Well Cementing Company.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
