Federal "B" Lease

Well No. 4-1 is located 600 ft. from N line and 600 ft. from E line of sec. 2

16-3 30-5 N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

West Henshaw Grayburg Edy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3810 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I plan to drill a 2800' Grayburg test, using cable tools all the way.

I plan to set 10-3/4" surface pipe in the top of the salt at approximately 535' with 50 sacks.

An intermediate string of 6-5/8" will be added at approximately 2125' for a water shut off, and later pulled.

A production string of 5 1/2" will be cemented at approximately 2765' with 100 sacks.

All casing will be run and cemented using methods approved by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
