Federal ~~WOM~~ Lease

Well No. **6-9** is located **660** ft. from **(N)** line and **1900** ft. from **(E)** line of sec. **9**

W 1/4 NE 1/4 Sec. 9 **16S** **30E** **N.M.P.M.**
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

West Henshaw **ddy** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **3817 3/4** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I plan to drill a 2875' Grayburg sand test, using cable tools all the way.

I plan to set 10 3/4" surface pipe in the top of the salt at approximately 500' with 75 sacks.

An intermediate string of 8 5/8" will be mudded at approximately 2125' for a water shut off.

A 5 1/2" oil production string will be cemented at T. D. 2875' ± with 100 sacks.

All casing will be run and cemented, using methods approved by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced. **1957**
