The elevation of the derrick floor above sea level is 3916. ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Present Condition: 2-7/8" EUE production string set at 3205' DF with 175 sacks of 50-50 Pozmix, 2% gel and 12.5#/sack of gilsonite. Top of the coment indicated at 2065' DF by temperature survey. Top of the salt section at 485' and the base of the salt at 1665' DF, top of the Queen at 2348' DF.

<u>Proposed Condition:</u> Cement the production string from 2065' DF to the bottom of the cellar thru 1" tubing down the annulus of 7" open hole and the 2-7/8" production string.

I understand that this plan of work must r	receive approval in writing by the Geologica	l Survey before operations may be commenced.
