The elevation of the derrick floor above sea level is 3772 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On January 16, 1958 we ran 431' of 10 3/4" OD 32.75# 8rd third new HS Spring casing to 537' and cemented with 50 sacks cement and 200 lbs. salt.

After allowing to stand cemented for 48 hours, we drilled plug, bailed hole down and re-ran bailer.

As Shut-Off proved complete drilling was resumed.

Cementing was done by Denton Oil Well Cementing Co.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
