Federal "D" Lease

Well No. **2-17** is located **660** ft. from **N** line and **660** ft. from **E** line of sec. **17**

16-S **30-E** **N.R.P.M.**
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Henshaw
(Field)

Eddy
(County or Subdivision)

New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is **3776** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I plan to drill a 2800' Grayburg test, using cable tools all the way.

I plan to set 8-5/8" surface pipe at approximately 550' in the top of the Salt, cementing with 50 sacks.

An intermediate string of 7" will be mudded at approximately 2300' and later pulled.

A 5 1/2" oil string will be cemented at approximately 2750' with 100 sacks.

All casing for this test will be run and cemented under methods approved by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
