Federal "D"
Well No. 2-17 is located 660 ft. from N line and 660 ft. from E line of sec. 17
N 1/4 NE 1/4 Sec. 17 16-S 30-E N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
West Henshaw Grayburg Eddy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3776 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

With the exception of the surface plug and marker, this work was performed March 20, 1957.

An 8 sack cement plug was set from T.D. 2773' to 2709'. Hole was then filled from 2709' to 2000' with heavy mud. A 16 sack cement plug was set from 2000' to 1950'. Hole was then filled from 1950' to 640' with heavy mud. A cement plug was set from 640' to 520' (Base of 8 5/8" surface pipe 572') with 35 sacks. A 10 sack surface plug with marker pipe was set at a later unknown date.

Location is now ready for inspection.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
