17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Administrative approval is requested to convert the No. 3 Etz well to water injection pursuant to NMOCC Order No. R-2977 in Case No. 3310, October 6, 1965.

A copy of our well status report, dated 5/7/76, is enclosed with accompanying regional and areal plats locating the Etz property.

The Etz property, situated in the SE quarter of Section 25, T16S, R30E, forms a part of a cooperative waterflood with Arwood, Ltd. and Anadarko Production Company. Water injection wells are located at each corner of the Etz quarter section. Five producing wells are located on the property on regular 40 acre tracts except for well No. 6 situated near the center of the quarter section. Original development plans were to cease corner injection when the offset producer watered out and to convert that producer to water injection status. We propose to follow this procedure and to initiate injection into our No. 3 well to inject water through tubing and below a packer set at 2975' into the Grayburg and San Andres horizons. Arwood, Ltd., as operator of the present No. 6 Loe water injection well, will either continue injection into that well to support their flood operation, or they will plug and abandon the well.
