Federal "E"
Well No. 1-11 is located 1980 ft. from NE line and 1980 ft. from NE line of sec. 31

NE 1/4 Sec. 31 16S 30E N.N.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Square Lake Grayburg Edgy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3706 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I plan to drill a 2600' Grayburg sand test, using cable tools all the way.

I plan to set approximately 500' of 10 3/4" surface casing with 75 sacks.

We will mud 8 5/8" around 2100' for a Queen water shut off.

A 5 1/2" oil string will be run. This will probably be cemented on bottom for production through perforations.

All casing will be run and cemented using methods approved by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
