1. The first group of variables is the "demographic" group, which includes age, sex, and education. These variables are used to control for differences in the population that might affect the results. For example, older individuals might have different preferences for health care than younger individuals, and individuals with higher education might have different health care needs than those with lower education.

Figure 1 illustrates the experimental setup. A subject is seated at a table, viewing a video screen. A camera is positioned above the screen. A target is located on the screen. A horizontal line is drawn on the screen, representing the target position. The subject's hand is positioned at the starting point. The distance between the starting point and the target is labeled as 'D'. The distance between the starting point and the video screen is labeled as 'L'. The distance between the video screen and the target is labeled as 'd'.

• **Control:** The ability to influence the behavior of others.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.
