Re: GOR Tests, North Square Lake  
Pool.

Gentlemen:

We are in receipt of Form C-116, "Gas-Oil Ratio Test Report" for your wells in the North Square Lake Pool. We notice some differences between these test GORs as reported on Form C-116 and on the actual production GORs as calculated from the production reported by you on Commission Form C-115. These differences are as follows:

<u>Lease</u>	<u>Well</u>	<u>Location</u>	<u>Test GOR C-116</u>	<u>Actual Production GOR</u>	
				<u>Oct.</u>	<u>Sept.</u>
State Y-3	#1 X	3-16-31	1715	1293	2142
"	#2 Q	"	3600	2085	2807

In so far as possible, the GORs reported on Form C-116 should reflect each well's actual production GOR and conversely the well's actual proportional production GOR should not vary exceedingly from that reported especially immediately after the annual test period.

We are therefore requesting that you furnish this office with any information available as to the cause of the differences previously mentioned a copy of the recording chart will be most useful If you have any questions concerning this matter do not hesitate to call upon me.

Very truly yours,

R. L. Stamets

RLS/uh

MSA/MS

E. L. Starnes
