## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We plan to drill a 3600' Grayburg sand test, using rotary tools.

We propose to set 150' of 8 3/8" surface casing with 75 sacks.

We plan to core the lower Grayburg sands, and set a 5 1/2" oil string on bottom with 100 sacks.

All casing will be run and cemented under methods approved by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
