## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We plan to drill a 3400' Grayburg test with rotary tools.

We propose to set approximately 735' of 8 5/8" surface casing in the top of the Anhydrite with 75 sacks.

We will set a 4 1/2" oil string through the pay sand with 200 sacks.

All casing will be run and cemented under methods approved by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
