North Square Lake Grayburg Eddy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 4052 ft.

DETAILS OF WORK

SEP 11 1961

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We plan to drill a 3400' Grayburg test with rotary tools.

We propose to set approximately 785' of 8 5/8" surface casing in the Anhydrite with 100 sacks.

We will set a 4 1/2" oil string through the pay sand with 200 sacks.

All casing will be run and cemented under methods approved by the U. S. G. S.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
