North Square Lake
(Field)

McMurry
(County or Subdivision)

New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is **4161.5** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We plan to drill a 3350' Grayburg test with Rotary tools.

We propose to set approximately 850' of 8 5/8" surface casing with 100 sacks.

We expect to run a 3 1/2" oil string through any pay sands and cement with 200 sacks.

All casing will be run and cemented under methods approved by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company **John H. Trigg**
