(State or Territory)

The elevation of the derrick floor above sea level is 4027 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging points, and all other important proposed work)

I plan to drill a 3400' Grayburg sand test using rotary tools.

We plan to set 720' of 8 5/8" surface in the top of anhydrite with 100 sacks.

The oil string will be approximately 3375' of 4 1/2", cemented through any pay sands with 200 sacks.

All casing will be run and cemented using methods approved by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
