(Range)N.M.P.M.  
(Meridian)North Square Lake Grayburg  
(Field)Edley  
(County or Subdivision)New Mexico  
(State or Territory)

The elevation of the derrick floor above sea level is 4122 ft.

RECEIVED

## DETAILS OF WORK

SEP 19 1961

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

We plan to drill a 3650' Grayburg sand test with rotary tools.

We propose to cut approximately 870' of 8 5/8" in the Anhydrite using 100 sacks.

We intend to run a 4 1/2" oil string through any pay sand, cementing with 200 sacks.

All casing will be run and cemented so as to meet with the U. S. Geological Survey's approval.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
