DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We plan to drill to a total depth of 3700' to test the Premier sand of the Graptolite formation. We plan to cement 90' of 32.75' 10-3/8" casing as surface, set 2000' 21' 8-5/8" casing, set 2100' 21' 7" casing. These last two strings of casing will be washed. In event of production, we will cement 9.5' 1 1/2" casing at 3700' and pull the 8-5/8" and 7" casing.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
