Well No. **4-10** is located **1900** ft. from **(N)** line and **990** ft. from **(E)** line of sec. **10****SE 1/4 Sec. 10** **16 South 31 East** **N.M.P.M.****North Square Lake Grayburg** **Eddy** **New Mexico**
(Field) (County or Subdivision) (State or Territory)The elevation of the derrick floor above sea level is **4285** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill a 3700' Grayburg sand test with rotary.

We will set approximately 800' of 8 5/8" surface casing into the Anhydrite and cement with 100 sacks.

We will run approximately 3700' of 4 1/2" casing as the oil string and cement with 200 sacks.

All casing will be run and cemented in accordance with methods approved by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
