Re: Gas Transporter NE Square
Lake Pr. Unit No. 24 L,
11-16-31, Eddy County,
New Mexico

Gentlemen:

We are in receipt of Form C-104 changing transporters and tank battery location for the subject well, these changes resulting from installation of LACT equipment. The Form C-104 does not, however, show a transporter of casinghead gas. As other wells tied into the LACT system battery show connections to Phillips Petroleum Company, we wonder if the subject well is not now also connected. Please clarify this matter for us, by return mail, at your earliest convenience.

Form C-104 will not be approved until we have received your reply.

Very truly yours,

OIL CONSERVATION COMMISSION

[illegible]

DeWitt and his colleagues have been studying the effects of the hormone melatonin on the brain for several years. Melatonin is a hormone that is produced by the pineal gland and is known to regulate the body's circadian rhythm. DeWitt and his team found that melatonin can also affect the brain's ability to learn and remember information. They found that mice that were given melatonin before a task performed better than those that did not. This suggests that melatonin may be a useful tool for improving memory and learning.
