(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

 Well No. 1 is located 1980 ft. from N line and 500 ft. from E line of sec. 19

14 S 31 E 34 N
 (Twp.) (Range) (Meridian)
Square Lake Elddy New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3869 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

To drill to the San Andres formation to an approximate depth of 3200 feet in search of oil and gas reserves. To set approximately 500 feet of 8 5/8" casing with 100 sacks of cement for surface pipe and to run 5 1/2" casing to production. Weight of casing, 8 5/8" - 32#; 5 1/2" - 15.5#. In the event that water is encountered in the Queen sand, 7" casing will be run to shut off that water.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
