17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

This well was Shut In by Anadarko on 5-11-85 after determining this Grayburg-San Andres Water Injection well to be ineffective.

On 5-22-85 Anadarko pressure-tested the 4 1/2" casing above the injection packer and casing failed to hold pressure. Well remains Shut In.

Anadarko plans to do one of the following in the near future:

1. Recomplete in Penrose as a gas producer.
2. Recomplete in another zone as an oil well.
3. Plug & Abandon the well.

Note: Notice of Intent will be filed with the BLM prior to doing any work since this is a Federal well.
