## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing jobs, and all other important proposed work.)

I plan to drill a 3,050' casingless well around east with rotary. We plan to set 350' of 8 5/8 surface casing with 125 sacks. We propose to run a 4 1/2" oil string, setting through any pay sands around 3,025' with 150 sacks.

All casing will be run and cemented under methods approved by the U. S. G. S.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
