Re: Sheldon Fed. #1, Unit
G, 28-16-31, Square Lake
Pool, Eddy County, N.M.

Dear Mr. Travis:

By your letter of November 6, 1961 you requested that we remove the subject well from the Square Lake Flood and place it in the Square Lake Pool section of the District II Oil Preration Schedule. The subject well is not now nor has it been shown as being in a water flood project. Therefore, we cannot remove it from such a project.

Perhaps this confusion has arisen from the fact that we have titled the Newmont Oil Company's Water Flood in the subject pool "Square Lake Flood". This title is for Newmont Oil Company wells only.

If you have any questions concerning this matter do not hesitate to call upon me.

Very truly yours,

R. L. Staats

Dear Mr. Brown:

As you know, on November 6, 1961 you requested that we remove the subject well from the Dwyer Lake Flood and place it in the Dwyer Lake Flood section of the District II Oil Protection Schedule. The subject well is not now and it has been shown as being in a water flood project. Therefore, we cannot remove it from such a project.

Perhaps this confusion has arisen from the fact that we have listed the Dwyer Lake Flood in the subject well as "Dwyer Lake Flood". This is the same as the Dwyer Lake Flood only.

If you have any questions concerning this matter do not hesitate to call upon me.

Very truly yours,

W. L. Brown
