1. The first step is to identify the variables involved in the problem. In this case, the variables are the number of hours worked per week (X) and the number of hours per week that the person spends on household chores (Y).

17. Summary of this page is for the condition of the well at the end of the year.

It is of the greatest importance to give a complete history of the well. Please state in detail the dates of retreating, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "rattacked," or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to rest for water, state kind of material used, position, and results of pumping or pulling.
