The elevation of the derrick floor above sea level is ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was drilled from an old depth of 3617' to 3724'. No treatment was given. Tubing was run to 3595'. Started pumping and is making 12 barrels a day. Before deepening well was making 2 barrels a day.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
