High Lonesome Pool

Gentlemen:

We are having some difficulty in getting our oil transported from the subject lease because of a discrepancy between the listing of the above wells and Well #4 which is located on the same lease.

In the Proration Schedule the above wells are listed as being on the Iles Lease, whereas the Well #4 is listed as being on the Iles Federal Lease. Actually, all four wells are on the same federal lease.

This lease, with Wells #1, 2, and 3, was purchased from George Atkins in late 1953. In early 1954, Well #4 was completed as a producer. When Forms C-110 were filed on Wells #1, 2, and 3 the lease name was erroneously listed as Atkins-Iles, but the Form C-110 on Well #4 was filed in the correct name of Iles Federal Lease. Apparently this is the reason for the two different listings in the Proration Schedule.

Would it not be best for us to re-file Forms C-110 on Wells #1, 2, and 3 under the correct lease name of Iles Federal? Please send us a supply of Forms C-110 (Revised 7-1-52)

Yours very truly,

J. C. CLOWER
