17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

This well had been pumping from perforations 6595-6600 and 6742-6750' for 6 months. Production declined to 1/2 BOPD in October due to equipment failure, rains and inundated roads. The rods and pump were pulled in November. Well flowed on stopcock from upper perforations during December. We now propose to perforate the Chester Lime at 8121-25, 8134-52 and 8168-69 and to attempt a gas well completion with packer at approximately 8050' and Canyon perforations blanked off in casing annulus.

*reported prod
1115 BO from
Canyon pipe-*
