Re: Bogle Farms No. 1 L, 13-16-31,  
Gas-Oil Dual

Dear Mr. Read:

Enclosed please find Supplement No. A 46 reassigning the oil allowable to the subject well.

The following additional information is required: Two copies of a "Packer Setting Report," three copies of Form C-103 showing work done and equipment run in the hole subsequent to the report of 3/6/66 and two copies of the gas test. Further, rather than a packer leakage test, the Commission will require a gas-oil ratio test to be made on the oil side of the dual completion. This test is to be made after the well has stabilized but should be reported no later than April 15, 1966.

Form C-104, for the gas zone will be approved after receipt of the "Notice of Gas Connection" from the gas purchaser.

Very truly yours,

OIL CONSERVATION COMMISSION
