23.

PROPOSED CASING AND CEMENTING PROGRAM

SIZE OF HOLE	SIZE OF CASING	WEIGHT PER FOOT	SETTING DEPTH	QUANTITY OF CEMENT
16"	13" surface		30'	
11"	*	24#	450'	
7-7/8"	4-1/2"	10.5#	3300'	250 sx.

* At H.J. Loe Federal Well No. 3 there was no loss of circulation. Therefore, we are setting up to set no intermediate string to 450 ft. provided no loss of circulation occurs to this depth. If there is a loss of circulation then 8-5/8" casing will be set to 450 ft. and cement circulated. If no 8-5/8" casing is run, 50 sx. cement will be spotted outside 4-1/2" casing thru 1" pipe.

The acreage dedicated (40 ac.) to the objective pay zone will cover the depth from approximately 3000 ft. to 3300 ft. covering the Metex and the Upper, Middle and Lower Premier in the lower Grayburg formation, and the Lovington in the upper San Andres formation.

Approval for this well has been granted by New Mexico Conservation Commission Hearing, Case No. 3310, Order No. R-2977-A.

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: If proposal is to deepen or plug back, give data on present productive zone and proposed new productive zone. If proposal is to drill or deepen directionally, give pertinent data on subsurface locations and measured and true vertical depths. Give blowout preventer program, if any.

Instructions

General: This form is designed for submitting proposals to perform certain well operations, as indicated, on all types of lands and leases for appropriate action by either a Federal or a State agency, or both, pursuant to applicable Federal and/or State laws and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 1: If the proposal is to redrill to the same reservoir at a different subsurface location or to a new reservoir, use this form with appropriate notations. Consult applicable State or Federal regulations concerning subsequent work proposals or reports on the well.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 14: Needed only when location of well cannot readily be found by road from the land or lease description. A plat, or plats, separate or on this reverse side, showing the roads to, and the surveyed location of, the well, and any other required information, should be furnished when required by Federal or State agency offices.

Items 15 and 18: If well is to be, or has been directionally drilled, give distances for subsurface location of hole in any present or objective production zone.

Item 22: Consult applicable Federal or State regulations, or appropriate officials, concerning approval of the proposal before operations are started.

**NEW MEXICO OIL CONSERVATION COMMISSION
WELL LOCATION AND ACREAGE DEDICATION PLAT**

Form C-102
Supersedes C-128
Effective 1-1-65

All distances must be from the outer boundaries of the Section.

Operator Ryder Scott Management Company			Lease Lee - Federal		Well No. 6
Unit Letter G	Section 25	Township T-16-S	Range R-30-E	County Eddy	
Actual Footage Location of Well: 2630 feet from the North line and 2630 feet from the East line					
Ground Level Elev: 3808	Producing Formation Sh. S A	Pool Square Lake	Dedicated Acreage: 40 Acres		

1. Outline the acreage dedicated to the subject well by colored pencil or hachure marks on the plat below.
2. If more than one lease is dedicated to the well, outline each and identify the ownership thereof (both as to working interest and royalty).
3. If more than one lease of different ownership is dedicated to the well, have the interests of all owners been consolidated by communitization, unitization, force-pooling, etc?

☐ Yes ☐ No If answer is "yes," type of consolidation NO COMMUNITIZATION

RECEIVED

If answer is "no," list the owners and tract descriptions which have actually been consolidated. (Use reverse side of this form if necessary.)

No allowable will be assigned to the well until all interests have been consolidated (by communitization, unitization, forced-pooling, or otherwise) or until a non-standard unit, eliminating such interests, has been approved by the Commission.
