If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well was changed from a producing gas well to a shutin gas well June 1, 1976, due to the removal of the gas compressor from this area by Chala Cryogenics (now TUCO, INC.), the gas purchaser, making it impossible for this well to deliver gas to the present gathering system due to the excessive pressure on that system.

A gas contract has been negotiated and executed with El Paso Natural Gas Company. Surveying is now in process and Phillips Gas Company, the carrier, has indicated that in a period of 6 to 8 weeks a connection should be made on this well and the Hinkle Federal No. 4.
