Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

After the Premier Zone was perforated from 2545' to 2590' (one shot per foot) well was acidized with 500 gallons of 15% N.E. acid, swabbed in and placed on test. This zone only tested approximately 12 MCF/D. This volume was tied into the existing system to provide additional volume to run gas engines on the High Lonesome Waterflood.

18. I hereby certify that the foregoing is true and correct
