=====Transposition of the pressure recorder charts=====

Test

The preceding is a transposition of the pressure recorder charts covering test to the blowout control equipment in service on your well drilling in the Artesia Area, Hobbs District, New Mexico. Test was made with test plug landed in casing head with the following test results:

TESTING: Blind Rams with outside valve closed off stack on kill line and all valves closed off choke-manifold cross - pressure applied thru test entry of outlet off blind rams bop. Leak to flange between manifold cross and wing valve off manifold cross (pipe rack side) with no pressure being applied. Tightened.
