Attention: Mr. Cecil B. Gritz;

Please file the attached requested reports
and logs.

The Federal "GR" lease was inspected
9-23-74, and these are several
things listed below that we are
concerned about:

1. No well is to be produced
until completion report (U.S.G.S. 2-330)
and NMOC C 104 are filed except
where testing is permitted by NMOC.

2. Pit water disposal and gas venting
has been approved by NMOC
for well No. 1 only.

3. There is a small leak through the
4 1/2 x 7 log annulus on well No. 6

(over)

It is hoped that you will take
care of these violations immediately.
