MWJ Producing Co.
Hanagan-Federal #1
Sec. 15-T 17S, R 27E
Eddy Co., NM.

Gentlemen:

Listed below are items of the development plan for surface use as required for our enclosed application to drill the captioned well.

1. Existing roads: See Plat #1.
2. Planned access roads: See Plat #2.
3. Location of existing wells: See Plat #3.
4. Lateral roads to well locations: See Plat #2.
5. Location of tank batteries and flow lines: The tank battery will be located near the east end of the drilling rig pad, a safe distance from the well with necessary flow line direct from the well to battery.
6. Water Supply: Water will be hauled from nearby commercial sources.
7. Waste Disposal: Solid waste will be buried. Trash will be collected on a daily basis and stored in a trash pit near the reserve pit for later burial.
8. Camps: None planned.
9. Airstrips: None planned.
10. Rig lay-out: See Plat #4.
11. Restoration of the surface: Location will be cleaned, pits filled and leveled.
12. The surface at the proposed location is flat, gently sloping to the northwest and consists of sandy soil, thinly covered with vegetation and grass. No ravines, or steep hillsides are near and only a minimum amount of levelling is anticipated for the location. There are no houses, buildings, or windmills nearby.
13. Field representative for compliance with above plan will be

John L. Schlagal
c/o MWJ Producing Co.
