17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1193.

This well is dually completed in the Morrow and Atoka with both zones depleted or unable to deliver gas into 160 psi sales. We propose to set Standing Valve in the Morrow packer, kill well, pull tubing, perforate another Morrow zone 8478-84' w/Tubing Conveyed Gun and treat as needed for production. The Atoka will be left in the annulus without swabbing back kill fluid.

10. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
