17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well is presently completed in the Eagle Creek Strawn, perforations 7639-45'. Production has declined to 20 MCPPD. We propose to temporarily abandon the Strawn and to perforate and stimulate the Eagle Creek-Permo Penn at 6817-36, 6680-92 and 6392-96. After establishing reserves in the Permo Penn, we will commingle the Permo Penn with the Strawn.
