17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

We propose to temporarily abandon the present Eagle Creek Strawn and E. Eagle Creek Atoka in order that we may perforate and test the Strawn porosity at 7864-74'. A standing valve will be set in the Strawn packer at 7962', hole loaded with KCL water, tubing pulled from on/off tool, a retrievable bridge plug will be set at about 7900' and will perforate 7864-74' w/Tubing Conveyed Gun and evaluate for reserves. After about 30 days will determine a revised allocation formula based on remaining reserves for each pool and re-submit for downhole commingling to include the new zone.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
