17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

This well is presently completed in the Richard Knob Atoka-Morrow and the Eagle Creek-Strawn, DHC II-7-A and production has declined to 8-100 mcfd. We propose to temporarily abandon the present completion by setting a standing valve in the Strawn packer, load hole & pull tubing, set a retrievable bridge plug in the 5½" casing at about 7400', perforate Canyon and Cisco pays at 7303-06', 7176-78', 6583-6600', 6524-28' and 6276-80', stimulate as needed for production.
