(NOTE: Report results of multiple completion on Well
Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well was salvaged by perforating additional zones until a reasonable flow rate was attained. This procedure resulted in commingling of the Strawn and Cisco formation (diagrammatic sketch attached). We suggest that the commingled production be apportioned as follows:

Eagle Creek Strawn - 11%

)

For both gas and Condensate

Eagle Creek Permo-Penn - 89%

)
