Re: West Federal #1  
Unit G, Sec. 14, T-17-S, R-27-E  
Eddy County, New Mexico

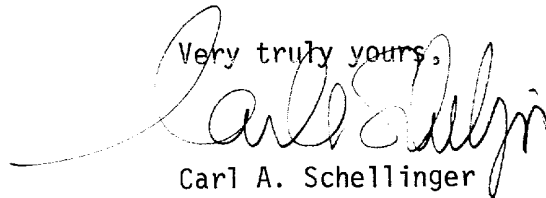

Dear Mr. Gressett:

We are enclosing a xerox copy of an 8-day chart furnished by Phillips Petroleum Company covering our West Federal #1 Well.

Although there are slight variations in rate of flow, Phillips calculates an average 24 hour flow rate for each of the 8-days as being 123 MCF gas per day through a 14/64" choke, flow casing pressure 150 psi. The well is flowing against a line pressure of approximately 22 psi.

Should you require something further from this office, please advise.

Very truly yours,

Carl A. Schellinger
