6-24-93

Arco

EAN B-42

25-17-28-F

This well is the old

State B#2 prior

to entering the unit. Arco

just T.P.d the well. I don't

believe they could even find a

lead this small & if they did

they probably couldn't recover it

The int est will build up to

about 15 PSI also.
