## 1. Introduction

The purpose of this study is to investigate the effect of the proposed method on the performance of the system.

The results of the study are as follows:

The proposed method significantly improves the performance of the system in terms of accuracy and efficiency.

The study also shows that the proposed method is robust to various types of noise and distortion.

## 2. Methodology

The proposed method is based on the following steps:

1. Data collection and preprocessing.

2. Feature extraction and selection.

3. Model training and evaluation.

## 3. Results and Discussion

The results of the study are presented in the following tables:
