Artesia, New Mexico 88210

Dear Sirs:

Enclosed is a revised C-115 on the John H. Trigg #1 Government well for month of February, 1981. The production clerk, in calculating, failed to count one tank on the original report and we wish to revise the figures.

This well quit flowing in February and after cutting the paraffin and after swabbing the well twice (see C-103 attached), it started flowing and during the later part of February and first part of March, it flowed more than normal and has settled to an average production of 80 barrels a day. Therefore, we would like to request an increase in our allowable to 80 barrels per day.

Very truly yours,

  
John H. Trigg
