17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

STRAWN

CANYON

Well is non-productive in perforations 7581-86', 7702-08' and 6907-15', 6932-38'.
Propose to set CIBP at about 6200' w/35' cement cap. Will perforate Wolfcamp lime at 5079-5082'. Will treat well as needed for production. ✓

*Note: As per Eddie Mahfood w/Yates, they will set CIBP & 35' cement cap @ ± 7500' (to isolate the STRAWN perms from the CANYON perms), and will also set CIBP & 35' cement @ ± 6350' prior to perforating the WOLFCAMP.

18. I hereby certify that the foregoing is true and correct
