

7. (continued) Sewage will be collected in a pit at least 6' deep below an outside latrine; suitable chemicals will be added to aid decomposition of the waste material. The pit will be back filled following completion of drilling operations. All pits will be fenced with normal fencing materials to prevent livestock from entering the area.
8. No ancillary facilities will be constructed.
9. Rig layout and cross section of the planned drilling site are shown on Exhibits IV and V. The reserve pits will be lined with plastic material.
10. Following completion of drilling operations, all pits will be filled and the area surrounding the location will be leveled or returned to its natural grade. Top soil will be stored near the drillsite and utilized to rehabilitate the location once drilling operations have ceased. If the well is not commercial, the drillsite and new access roadway will be graded to conform to original topography, top soil spread, and the entire location re-seeded. We will re-seed with seed type (and quantities) as recommended by the BLM. All re-seeding will be done with reasonable effort to establish a more attractive soil stabilizing growth of vegetation than what previously existed at the site. Re-seeding will take place at the first opportunity following completion of operations in accordance with the recommended seasonal seeding periods.
11. The area around the drilling site has a gradual sloping trend to the north and south. The surface supports a sparse growth of grass, sagebrush and greasewood. Domestic livestock are grazed in the area. The proposed roadway in Section 4 and the surface at the location are on federal acreage.
12. The Mesa Petroleum Co representatives responsible for conducting this drilling operation are:

J. W. HART  
P.O. Box 1756  
Hobbs, N.M. 88240

13. CERTIFICATION

I hereby certify that I, or persons under my direct supervision have inspected the proposed drillsite and access route; that I am familiar with the conditions which presently exist; that the statements made in this plan are to the best of my knowledge, true and correct; and that work associated with the operations proposed herein will be performed by Mesa Petroleum Co and its' contractors and sub-contractors in conformity with this plan and the terms and conditions under which it is approved.

  
Michael P. Houston, Operations Manager
