

9. Well Site Layout: (See Drilling Plat)

10. Plans for Restoration of the Surface: If well is plugged, all pits will be closed, anchors cut off below ground level, marker set and surface soil bladed back across location. Caliche is close to surface and to rip the location would probably leave it in good condition. Save ranch road as is.

11. Other Information: Location area has native grass and mosquito. Light top soil in places.
